LARGEMOUTH BASS LAKES IN ONTARIO

EXPLANATORY NOTES

This atlas represents our understanding of the distribution of largemouth bass lakes in Ontario as of March 1990. This record was compiled from the Lake Inventory Data Base with additions and amendments made by District staff.

The atlas is organized by district code. The data fields listed are:

1. Lake Name: Gazetteer name (1974 Gazetteer or its 1977 supplement), followed by local name, if any, in parenthesis.

Lakes not listed in the gazateer are identified by their local name, followed by (NL).

If no lake name is available, the lake is identified as NL.

For populations of largemouth bass found in the Great Lakes, each Great Lake is listed only once, as follows:

Lake	District	District Code
Superior	Thunder Bay	25
Huron (incl. Georgian Bay)	Chatham	82
Erie	Chatham	82
St. Clair	Chatham	82
Ontario	Napanee	64

Rivers are not listed in this atlas.

2. District: See page ii for district codes.
3. Township:
4. Latitude:
5. Longitude:
6. Survey Status: In order to qualify as surveyed, a lake must have had a complete survey following the standards for Aquatic Habitat Inventory Surveys.
7. Watershed Code:
8. Lake Area: the surface area of the lake in hectares.
9. Area Code: As not all lakes in the atlas have had their area accurately measured the area is also given as one of the six categories:

1	<10 ha
2	10-100 ha
3	100-1000 ha
4	1000-10000 ha
5	>10000 ha
9	unknown
